10 (Currently Amended) A printing machine for ~~said~~ creation of a toner-based printing format on a printing medium, ~~in a printing process that is toner based, characterized by said printing machine comprising:~~

_____ at least one first printing unit, a fuser mechanism (13) for fixing a toner-based printing format on a printing medium formed by said at least one first printing unit, said at least one first printing unit located upstream of said fuser mechanism (13) for applying and fixing to a printing medium (8), a toner for forming an image to be reproduced, and at least one second printing unit (20) that is located downstream of said fuser mechanism (13) that contains an aromatic substance or includes an ink (15) that contains an aromatic substance.

11 (Currently Amended) A printing machine according to Claim 10, ~~characterized by wherein said~~ at least one first printing unit ~~being is~~ an electrophotographic printing unit (2) that is located ~~in said area~~ upstream of a said fuser mechanism (13) of said printing machine.

12 (Currently Amended) A printing machine according to Claim 10, ~~characterized by wherein said~~ at least one second printing unit ~~being is~~ an ink jet mechanism (20) that is located ~~in said area~~ downstream of a said fuser mechanism (13) of said printing machine.

13. (New) A printing machine according to Claim 10,
characterized by wherein said at least one first printing unit is an
electrophotographic printing unit (2) that is located upstream of said fuser
mechanism (13) of said printing machine, and said at least one second printing
unit is an ink jet mechanism (20) that is located downstream of said fuser
mechanism (13) of said printing machine.
